

# 20<sup>th</sup> International Elephant Conservation and Research Symposium

## July 30~August 2, 2024

Presented by  
International Elephant Foundation

After an incredibly successful 19<sup>th</sup> International Elephant Conservation and Research Symposium in Chiang Mai last year, the International Elephant Foundation realized we cannot wait until our next in-person event which will be in 2025 to give the world's elephant experts and enthusiasts an opportunity to share knowledge and connect. This year we will host the 20<sup>th</sup> International Elephant Conservation & Research Symposium virtually.

For the 19<sup>th</sup> symposium we received more presentations than we could accommodate indicating to us that many global elephant conservationists and researchers would be interested in presenting their work virtually at this special event.

We are now accepting abstracts. Presenters are requested to attend the live virtual sessions for questions but your presentations must be recorded in advanced to avoid technological problems. Presentations can cover a wide range of issues relevant to elephants as a species and conservation. Such issues can be conservation projects and research outcomes, new technologies in field conservation and conflict mitigation, studies in disease, reproduction behavior, management, education, wildlife film making, and other subjects that impact the long-term survival of African Savannah, African Forest, and Asian elephants. To submit an abstract, please follow the instructions linked here.
